To the hiring team, Meta Robotics, Singapore · October 2026

Application: Performance Marketing Specialist

Google Ads & Meta Ads

Hi Meta Robotics team,

Your brief asks for better leads and more bookings, with someone who can find the problem and act on it. I bring paid acquisition experience since 2021, current leadership of two media buyers, and hands-on ownership of landing pages, CRM and tracking.

> **14 → 24 net enrolments. Same USD 3,000 monthly media budget.**
>
> In July–August 2026, I refined Search exclusions, offer/location qualification and creative review for an education acquisition campaign. Media cost per enrolment fell 41.7%, to USD 125; Search contributed nine of the August enrolments. Both cohorts use a 30-day outcome window per enquiry. These are my reported results; the portfolio explains my role, counting rules and source scope.

For Meta Robotics, I would start by agreeing what makes a parent enquiry qualified, checking the booking-to-payment signal, and testing one focused RDA offer. My weekly update would connect spend to qualified leads, paid bookings and enrolments, followed by the next decision—not just a platform dashboard.

AI in my workflow: I use Claude and ChatGPT for research and copy, define automation requirements and review outputs before action. A separate 50-enquiry evaluation reduced processing time from 150 to 60 minutes including review; two initial labels needed correction. Taste Brief, website demos and an n8n prototype are linked as work samples.

Materials: one-page CV, four-page portfolio and a linked pilot workbook.

Expected fee: SGD 2,000/month for 20 hours/week, covering campaigns, optimisation, measurement and reporting. Media costs are separate. The pilot model separately budgets SGD 300 for 12 later follow-up hours.

Availability: from 2 November 2026. Proposed hours: Monday–Friday, 8–10 AM and 7–9 PM Singapore time. Written updates in English; calls within these windows. Centre staff would handle customer responses and alerts outside them.

Thank you for considering my application. I would welcome the opportunity to walk you through the decisions behind these results.

Best regards,
Tran The Long
